

ABSTRACT OF THE DISCLOSURE

1 A tie-down strap or chain anchor is described for use with a trailer or truck. The
anchor includes a stem portion which is adapted to be secured to one side of the bed of
the trailer or truck. A pair of spaced-apart plates are secured to the upper end of the
5 stem portion and have a J-shaped receiver secured thereto and extending
therebetween which includes an inclined portion and a generally U-shaped portion at
the lower end thereof. The U-shaped portion has a slot or notch formed therein.
